This release addresses the third phase of PAF/Action Codes modifications to the Base Payroll/Personnel System under Service Request 3607. Release 535 issued the majority of changes to the EDB maintenance process as Phase I of the implementation of PAF/Action Codes modifications. Release 542 issued additional changes to EDB Maintenance, the Compute, Monthly Reporting, Costing and Rush Check processing. This release addresses changes to Merit, Range and Mass Change processes. Modifications to programs PPP670 and PPP680 for PAF/Action Codes will be released as soon as possible as part of a batch conversion release.

Service Request 3607

Service Request 3607 asks for the implementation of a new Personnel Action Codes structure which provides the ability to associate actions with specific appointments and distributions, as well as to the overall employee record.

This release specifically addresses moving action codes from the employee level to the appointment and distribution levels. Action code 28, Range Adjustments, has been moved to the distribution level. Action code 29, Mass Changes, has been replaced by the following three action codes. Action code 25, mass Title Code change, is located at the appointment level. Action code 47, mass Account/Fund change, is located at the distribution level. Action code 49, mass Distribution Unit Code, is located at the distribution level.
Programs
PPP930
This program has been modified to use the data element 'LAST-DAY-ON-PAY' in place of 'SEPARATION-DATE' when determining whether an employee is eligible for a retro-active 'Special Payment' range adjustment.

DB2 Programs
PPP290
This program was modified to produce Mass Change Transactions in the revised File Maintenance Transaction format consistent with the new PAF transactions. Generated action code '29' was replaced with three new action codes as follows:

- The mass Account/Fund action code is '47'. This action occurs at the distribution level.
- The mass Title Code action code is '25'. This action occurs at the appointment level.
- The mass Distribution Unit Code action code is '49'. This action occurs at the distribution level.

PPP910
This program was modified to produce Range Adjustment Transactions in the revised File Maintenance Transaction format for the new PAF transactions.

The preliminary input and output transactions were revised to reflect the deletion of obsolete data elements and the addition of new data elements.
