This electronic mail communication constitutes an official release of a change to the University of California Base Payroll System. A confirmation release letter will follow by U.S. Mail, but campuses are authorized to install this release immediately upon receipt of this communication.

Release 1068 modified Base Payroll programs which edit compute transactions in support of the Human Resources Management Initiatives (HRMI) requirements. One of the HRMI requirements was a new appointment type code of '7' to identify staff employees in Partial-Year Career positions.

Program PPGRSCBD, which moves the appointment type to the Payroll Audit Record (PAR), should also have been modified at this time as part of Phase 1 of the HRMI project. Currently, there is a range edit in section 4000-CBD-PROCESS which, when pay is entered via transactions other than AU, TE and TX, checks whether or not the Appointment Type Code is in the range of 1 through 6 before it is written to the PAR File. If it is not in this range, a blank is written to the PAR. The range of valid Appointment Type Codes should be change to 1 through 7. Note that if pay is time exception or time positive, then the correct Appointment Type Code is moved to the PAR.

Release Title: Appt Type Code range fix  
Reference Release: 1068  
Programs Being Modified: PPGRSCBD  
Error Report: 1421  
Change Mark: 28201073  
Urgency: Urgent.

1. Make the following changes to COBOL program PPGRSCBD.

At the beginning please insert the following flowerbox:

```
**********************************************************************
* PROGRAM: PPGRSCDB                                               *
* RELEASE: ___1073_____ SERVICE REQUEST(S): ___12820____  *
* REF RLSE ___1068_____                                      *
* NAME:______M SANO_____ MODIFICATION DATE:  ___06/28/96__  *
* DESCRIPTION:                                              *
* - CHANGED RANGE OF APPOINTMENT TYPE TO VALUES 1 THROUGH 7 *
**********************************************************************
```

2. In section 4000-CBD-PROCESS, find the following code and make the following changes:

```
4000-CBD-PROCESS SECTION.
.
.
*** SET THE ACCT-WORK-AREA APPOINTMENT TYPE CODE
```

**********************************************************************
SKIP1
IF X-EARN-DIST-SOURCE = 'A'
   OR (CURRENT-PPED
      AND KGRS-CB-APPT-MATCHED
      AND X-EARN-DIST-SOURCE = 'T'
      AND ACCT-WORK-TITLE-CD = KTAP-TITLE-CODE)
      MOVE KTAP-APPT-TYPE TO ACCT-WORK-APPT-TYPE
ELSE
   **** IF (ACCT-WORK-APPT-TYPE < 1 OR > 6) <======= comment out
   IF (ACCT-WORK-APPT-TYPE < 1 OR > 7) <======= insert
      MOVE SPACE TO ACCT-WORK-APPT-TYPE
   **** AND IF NEITHER IS TRUE, LEAVE APPT-TYPE ALONE
   ELSE
      CONTINUE
END-IF

Testing
-------
The existence of this problem was verified by running the monthly compute using the pre-modified version of PPGRSCBD. Transactions were input with the Appointment Type coded as '7'. The transactions were accepted but the Appointment Type was not written to the PAR record. Therefore, when PPP440 was run to print the PAR, a blank was displayed rather than a '7' for the input transactions.

PPGRSCBD was modified as shown above, and the test compute rerun. Appointment Type '7' rather than a blank appeared on the appropriate records of the PAR Report.

Installation Instructions
-------------------------
1. Modify program PPGRSCBD per instructions above.
2. Compile and link program PPGRSCBD into the batch LOADLIB.
3. Perform the above test.
4. Perform any desired local tests.
5. Install in production.

The modified program is available on the payroll FTP site, in the PAYDIST.R1073.COBOL library.

Timing of Installation
----------------------
The installation of release 1073 is Urgent. If Release 1068 has not been installed, install this release together with release 1068. If release 1068 has already been installed, install this release immediately to prevent the problem described above from occurring.

If there are any questions, please send electronic mail to Madelyn.Sano@ucop.edu, or call on (510)987-0465.
