This release is Phase IV of the Human Resources Management Initiative (HRMI) project. It covers requirements in Addendum to Service Request 14298, dated September 5, 1996.

Addendum to Service Request 14298

Addendum to Service Request 14298, dated September 5, 1996, asks that the Merit (M1) Transaction Processing program, PPP680, be modified to recognize the Personnel Program Code (EDB 2007) values 1 and 2, and the new merit roster types, 1, 2, and 3, introduced with HRMI Phase III. The roster types on UPAY Form 722, which is the run specification record layout, must also be changed.

In order to fulfill these requirements program PPP680 and form UPAY 722 have been modified.

DB2 Programs

PPP680

This program has been modified to recognize Personnel Program Code values ‘1’ and ‘2’ as selection criteria for inclusion in the PPP680 reports. Employee data is included in the Professional and Support Staff (PSS) reports and PSS totals if the Personnel Program Code has a value of ‘1’. Employee data is included in the Management...
and Senior Professional (MSP) reports and MSP totals if the appointment has a Personnel Program Code value of ‘2’, and it does not have a Title Code value of 0001 through 0199. Employee data is included in the Senior Management reports and Senior Management totals, if the appointment has a Personnel Program Code value of ‘2’, indicating Management and Senior Professional, and has a Title Code value of 0001 through 0199.

**Forms**

**UPAY 722**

This form has been modified to show the new roster types 1, 2 and 3. A sample version of this form is available with this release.

**Table Updates**

**System Message Table**

Entries must be made to delete obsolete messages issued by program PPP680.

Transactions to update this table have been made available with the release in the PAYDIST.R1085.CARDLIB(MSGPROD) file and should be used for both test and production.

**Test Plan**

A complete test plan is included with the release. Campuses are encouraged to use the base system test materials, as well as augmenting them with any desired local tests.

**Installation Instructions**

Install this release as follows.

1. Modify program PPP680.
2. DB2-precompile, compile, and link PPP680 into the batch loadlib (LOADLIB).
3. Bind the plan for PPP680.
4. Perform the testing described in the test plan sent with the release.
5. Perform any desired local testing.
6. Install the modified program in production.
7. Update the production System Messages Table by executing program PPP010 using the transactions made available with this release in the PAYDIST.R1085.CARDLIB(MSGPROD) file.

**Timing of Installation**

Installation of this release is urgent with installation of Release 1083. Prompt installation of this release is encouraged in order that merit transactions can be processed for the October 1, 1996, merit cycle.
As usual, campuses are encouraged to install this release in as timely a fashion as possible, and in the normal numeric sequence of releases.

If there are any questions, please send electronic mail to Madelyn.Sano@ucop.edu, or call on (510)987-0465.
