This release addresses the following Error Report:

**Error Report 1463**

Error Report 1463 states that when an employee’s name (EDB 0105) is changed via the batch File Maintenance Process, the employee’s prior name is automatically recorded in data element 0313 (EMP OLD NAME). However, when the employee’s name (EDB 0105) is changed through on-line Entry/Update, the employee’s prior name is not recorded in data element 0313.

CICS program PPWEEID (screen processor for function EEID) has been fixed to record the employee’s prior name in data element 0313, whenever the employee’s name (EDB 0105) has been changed.

**CICS Program**
