Error Report 1468

This release addresses Error Report 1468, which states that the Retirement/FICA Derivation Indicator is displayed with an incorrect CTT translation when the Retirement/FICA Indicator value is blank. It appears the translation of the FICA Eligibility Code on the previous line is incorrectly carried forward and displayed.

This occurs in program PPNTFICA. The text line that is sent to the screen is not initialized with spaces when the Retirement/FICA Derivation Indicator is blank. The paragraph this occurs in is 2000-CREATE-TEXT-LINES.

This has very little impact since RET-FICA-DERIVE is not blank in most cases (employees with minimal records, i.e. EMP-NAME = ALL "*" can have a blank value).
DB2 Programs

PPNTFICA

Program PPNTFICA has been changed to move spaces to the text line, FR-LINE-X-DATA, before ‘Ret/FICA Derive’ information is formatted into it.

Test Plan

A complete test plan is provided with this release.

Campuses are encouraged to use the base system test materials, as well as performing any other desired local tests.

Installation Instructions

Installation of this release requires the following steps:

1. DB2 Precompile, Compile and Link modified dual-use program PPNTFICA in the batch and on-line loadlibs.

2. Perform tests similar to those described in Test Plan.

3. Perform any desired local testing.

4. Install program PPNTFICA in production.

Timing of Installation

Installation of this release is not urgent.

As usual, campuses are encouraged to install this release in as timely a fashion as possible, and in the normal numeric sequence of releases.

If there are any questions, please send electronic mail to Roy.Staples@ucop.edu, or call at (510) 987-6092.
