Service Request 17315

Service Request 17315 asks that the Title Code Table (TCT), which is part of the Payroll/Personnel System (PPS), be modified to accommodate changes made to the University Title Code System (TCS). In making this accommodation, the structure and relationships of the DB2 tables which comprise TCT have been significantly modified. These structural changes have been made so that the data in TCT will more closely correspond to that within TCS.

In addition to changes to the TCS-to-TCT relationship, which motivated this release, other changes are being made within PPS. A number of PPS programs have accessed TCT data directly, rather than using the Title Code Table utility program, PPTCTUTL. For the most part, such direct access is being eliminated in this release. Approximately 30 programs are being modified to call PPTCTUTL.

Finally, the update of the TCT has been radically re-written. This was done to move in the direction of the new architecture of the Control Table Update process, which is currently being developed in accordance with Service Request 3087.

Release Objects

For a complete list of release objects, please refer to the Object List attachment which accompanies this release. For descriptions of the nature of modifications for a particular object or a description of an objects attributes and functions, please refer to the Detailed Design document which accompanies this release.
Installation Instructions
For detailed installation instructions, please consult the Installation Instructions document which accompanies this release.

Test Plan
A test plan was prepared for this release and is described in detail in the accompanying Test Plan document.

Timing of Installation
The installation of this release is urgent.

In any event, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.

If there are any questions, please send electronic mail to William.Gayle@ucop.edu, or call at (510) 987-0463.
