Introduction

This document provides installation instructions for release 1307. Please review these instructions carefully before proceeding with the installation.
Installation Sequence

1. Drop obsoleted view on EDB using the RC/MIGRATOR.

   RC/Migrator strategies R1307U in the ANALYSIS PDS can be used to perform the DB2 change, or the environment may be updated using the DDL member which is also provided.

   If you do not wish to use the RC/Migrator strategies, skip this step and continue with step 2.

   a) Modify ANALYSIS member R1307U by replacing "*AUTHID*" with the appropriate campus value.

   b) Use RC/Migrator to execute the strategies.

   c) Skip 2 and continue with step 3.

2. Obsolete view PPPV650E_PERPCM

   Modify the DDL member (DROPVIEW) by replacing *AUTHID* with the proper campus Authid.

   Drop the obsoleted view PPPV650E_PERPCM by executing the modified DDL member.

3. Bind Member

   a) Install the following new Bind member.

<table>
<thead>
<tr>
<th>Bind Members</th>
<th>Installed?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT1307</td>
<td></td>
</tr>
</tbody>
</table>

4. COBOL Program Installation

   At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.
Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

a) Install, compile and link the new program listed in the following table.

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2 Pre-Compile</th>
<th>Compile</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT1307</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

b) Modify, install, compile and link the modified programs listed in the following table.

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2 Pre-Compile</th>
<th>Compile</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPEC102</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEC115</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEC120</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEC133</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEC134</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEC135</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEI340</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEI350</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPP567</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPP650</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

5. Bind the following Plans.

<table>
<thead>
<tr>
<th>Bind Plans</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT1307</td>
<td></td>
</tr>
<tr>
<td>PPP080</td>
<td></td>
</tr>
<tr>
<td>PPP120</td>
<td></td>
</tr>
</tbody>
</table>
6. CICS HELP

a) Import revised CICS HELP anchors data from PAYDIST.R1307.HELPANCH (refer to sample JCL in PAYDIST.R1307.JCL(LOADANCH)).

7. Install Control Table (CTL) updates into production.

   Execute **PPP010** to update the VSAM production Data Element Table, and System Messages Table with the transactions supplied in the following release CARDLIB files.

   - **DETPROD**
     
     Use the transactions in CARDLIB(DETPROD), or key from the provided facsimile UPAY553 form. These transactions may be used both for testing and production, with the approval of your campus Payroll Manager.

   - **MSGPROD**
     
     Use the transactions in CARDLIB(MSGPROD), or key from the provided facsimile UPAY554 form. These transactions may be used both for testing and production, with the approval of your campus Payroll Manager.

     Update the DB2 production tables by executing program PPP851 for Tables 06 and 08.

8. Run the one-time program **PPOT1307**.

   **PPOT1307** updates the plan coverage levels.

   The Employee Change File (ECF) produced from this one-time program should be processed into the History Process.

   It is highly suggested that the One-time program **PPOT1307** be run immediately after the next scheduled Daily Process. This would ensure that all appropriate plan coverage levels are appropriately updated by the daily process prior to running the one-time program.
9. JCL Changes

Create JCL for the one-time program **PPOT1307**. Sample JCL is included in PAYDIST.R1307.JCL.

10. Follow local procedures to remove the following obsolete DDL and Include:

- **DDL**
  
  PPPV650E

- **Include**
  
  PPPV650E
