Urgency: Not Urgent (See Timing of Installation)

**Error Report 1851**

Error Report 1851 reported that unlike the Inbox and Notification Selection Web PAN pages which display a range of dates from the oldest PAN to current date, the Audit Review page displays both “from” and “to” set to current date. There are pull-down menus from which different month and day values can be chosen, however the only year value available for selection is the current year. The Audit Review page should allow the same selection criteria as the Inbox and Notification Selection pages.

With this release, the Audit Review page allows for selection back to the oldest Web PAN available.

**Error Report 1852**

Error Report 1852 reported that one net.data web object released with Release 1415 contained an edit on Security Prefix which was incorrect. The code released with Release 1415 required that Security Prefix values be exactly 4 digits long. In fact, this restriction is not required, allowing considerable flexibility in the values that each site may code.

With this release, this edit has been corrected.
Web Macros:

UCWIAUD.D2W (UCWIAUD)

With this release, the Audit Review page allows for selection back to the oldest Web PAN available.

UCWPANROUTER.D2W (PPSPROUTE)

With this release, the Security Prefix may be any length a campus requires.

Installation Instructions

Review and edit the job "PDS2HFS" in the JCL library to transfer the web application files to the application directory structure. Edit the control statements to supply the local directory names created in the Web EDB inquiry release 1415.

Run this jobstream once the necessary customization has been made.

After running the PDS2HFS jobstream, verify that the following Net.data files were copied to the “macro” directory created in the Web EDB inquiry release 1415:

<table>
<thead>
<tr>
<th>Filename</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ucwiaud.d2w</td>
<td>Audit review page</td>
</tr>
<tr>
<td>ucwpanrouter.d2w</td>
<td>Main navigation driver for web PAN.</td>
</tr>
</tbody>
</table>

Once the macro files have been copied, use the `chmod` command to set permissions on all files to 755. The group ownership of all files may be left as-is, assigned to the group associated with the installer ID.

$ chmod 755 *

Test Plan

The Campus that reported these errors has tested the modifications in this release.

Campuses are encouraged to perform any other desired local testing.

Timing of Installation

The installation of this release is not urgent. However, if your campus has already installed Release 1415, these modifications should be made as soon as possible.

As usual, campuses are encouraged to install this release in as timely a fashion as possible, and in the normal numeric sequence of releases.

If there are any questions, please send electronic mail to Susan.Isaacs@ucop.edu, or call at (510) 987-0465.
