Introduction

This document provides installation instructions for release 1513 to add Across the Board (ATB) Merit with the existing online Merit System by adding 2 more Cycle Types (ATB-Step and ATB-Open-Range) with the existing 2 Cycle Types (Merit-Step and Merit-Open-Range).

Please review these instructions carefully before proceeding with the installation.

Installation Sequence

1. Install for Testing:
   - COBOL Program Installation

   At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

   **Note:** "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

   Modify, install, compile and link the **modified** program listed in the following table.

2. Execute and verify the rest of the test plan, per supplied instructions.

3. Perform any desired additional campus testing.

4. Install into Production:
   - Install COBOL Program and Bind the Plan as described in the installation instruction above for the testing.
5.  JCL Changes

The Sample JCL is included in PAYDIST.R1513.JCL.

I.   RUN675  ➔ This is for running the extract program to extract data from EDB to Merit tables. The DD name PAYRTFL for the Pay Scale file is added to this JCL.

II.  RUN676  ➔ This is to run the update program which creates the update transactions to the EDB. There is no change needed for this JCL.

6.  Startup Instructions

None.
