This release addresses the following error report:

**Error Report 1878**

It has been reported that the EDB File Maintenance Process does not prevent the update of the BELI Effective Date (EDB 0341) to a different date when the BELI Indicator (EDB 0360) has not changed in value.

This is a case where an active employee is selected, the BELI Indicator value is changed to itself and the BELI Effective Date is changed to a different date. However, the EDB File Maintenance Process does not issue message 08-336 “BELI EFFECTIVE DATE INPUT, NO BELI CHANGED”, and the BELI Effective Date is allowed to be updated.

PPEI204 should be modified to disallow the BELI Effective Date to be updated when the BELI Indicator has not changed to a different value. The BELI Effective Date should be reset to the original BELI Effective Date, and message 08-336, should be issued.

**Programs**

PPEI204

This module has been modified to reset the BELI Effective Date to its original value, and issue message 08-336 when the BELI Effective Date is changed to a different value and the BELI Indicator has not changed to a different value.
Test Plan

To verify that module PPEI204 has been modified to disallow the update of the BELI Effective Date to a different
date when the BELI Indicator has not changed to a different value, follow the steps below to test modified PPEI204
via the CICS on-line system:

1. Select an active employee.

2. Via the EINS screen, change the Assigned BELI (EDB 0360) value to itself, and change the BELI Effective
Date (EDB0341) to a different date, message 08-336 (BELI EFFECTIVE DATE INPUT, NO BELI
CHANGED) should be issued. At the ECON screen, press PF5 (Update).

3. Upon return to the EINS screen, verify that the BELI Effective Date has been reset to its original value.

If the unmodified version of PPEI204 is run, message 08-336 is not issued and the BELI Effective Date is updated.

Installation Instructions

1. Program Preparation

   Note: At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains
   embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

   Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and
   "OLOADLIB" respectively), and DUAL-ONLINE programs must be compiled once only and linked into the
   online library. "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB.
   "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

   a) Install, compile, and link the modified program listed in Table 1

<table>
<thead>
<tr>
<th>Program Name</th>

</tbody>
</table>

   Table 1

2. Testing

   Perform installation verification testing as described above.

   Perform any desired additional campus testing.

3. Place modified objects in production.

Timing of Installation

The installation of this release is Date Mandated.

For those campuses that have already installed Release 1511, this release must be installed as soon as possible, but
not later than September 30, 2003.
For those campuses that have not yet installed Release 1511, this release must be installed together with Release 1511, and not later than September 30, 2003.

If there are any questions, please send electronic mail to Jackson.Quan@ucop.edu, or call at (510) 987-0464.
