Testing Overview

This test plan addresses the test runs and cases constructed to verify the correct installation of Release 1562. The test is made up of the following components:

1. Control Table Data Base (CTL) Initial Load (LOADCTL)
2. Employee Data Base (EDB) Initial Load (LOADEDDB)
3. CTL Table Updates (RUN004A)
4. Control Table Data Base (CTL) Initial Load (LOADCTL)
5. CTL Table Updates (RUN004B)
6. Web Merit

CONTROL TABLE (CTL) INITIAL LOAD (LOADCTL)

Description

This job loads the DB2 CTL database.

Verification

Ensure that the DB2 CTL has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base. The members in PDS UDB2CTL already reflect the updates applied to the DB2 Control tables.

EMPLOYEE DATA BASE (EDB) INITIAL LOAD (LOADEDDB)

Description

This job initially loads the EDB database.

Verification

In order to assure successful completion of this job, verify that the EDB has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base.

CTL Table TCT Updates (RUN004A)

Description

This job updates the specific title code tables via TCT update transactions.

The first step in the JCL contains a batch SPUFI which updates the CCR-Location to '04 (UCLA) on the PPPCCR Table.

Note that the first set of transactions contains rates related to Sub-Location of 'AG' and the second set of transactions contains rates related to Sub-Location of 'EA'.

Verification

Since the CCR-Location is set to '04' (UCLA), verify that all transactions containing Sub-Location of 'AG' are rejected, and all transactions containing Sub-Location of 'EA' are accepted.

CONTROL TABLE (CTL) INITIAL LOAD (LOADCTL)

Description

This job loads the DB2 CTL database.

Verification

Ensure that the DB2 CTL has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the data base. The members in PDS UDB2CTL already reflect the updates applied to the DB2 Control tables.

CTL Table TCT Updates (RUN004B)

Description

This job updates the specific title code tables via TCT update transactions.

The first step in the JCL contains a batch SPUFI which updates the CCR-Location to '03 (UC Davis) on the PPPCCR Table.

Note that the first set of transactions contains rates related to Sub-Location of 'EA' and the second set of transactions contains rates related to Sub-Location of 'AG'.

Verification

Since the CCR-Location is set to '03' (UC Davis), verify that all transactions containing Sub-Location of 'AG' are accepted, and all transactions containing Sub-Location of 'EA' are rejected.

Web Merit

The Web Merit has been tested at UCOPP to verify that the appropriate rates are returned from PPTCTUTL.

Test Cases using as input Sub-Location of 'GN':

1. An appropriate Title Code (non-academic title) is selected on the TSL, TSB, and TRR Tables with only default Sub-Location of '**' rates present. PPTCTUTL cannot find the selected Title Code with Sub-Location 'GN'. Therefore PPTCTUTL returns the rates for default Sub-Location of '**' back to the web merit process.
2. The appropriate rates for Sub-Location 'GN' are set up for the selected Title Code on the TSL, TSB, and TRR Tables. PPTCTUTL finds Sub-Location 'GN' and returns the rates back to the web merit process.
