Introduction

This document provides installation instructions for release 1607. Please review these instructions carefully before proceeding with the installation.

Installation Sequence

1. Install the following new Bind members listed in the following table.

Bind Members	Installed?
PPO1607A	
PPO1607B	

2. COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

- a) Modify, install, compile and link the **modified** programs listed in the following table.

PROGRAM	DB2 Pre-Compile	Compile	Package Bind?	Done?

7. Execute and verify the rest of the test plan, per supplied instructions.
8. Perform any desired additional campus testing.
9. Place modified objects in production.
10. Install Control Table (CTL) updates into production.

Execute **PPP004** to update the following DB2 CTL tables with **release transactions**.

- System Parameter Table (01) – Use the transactions in CARDLIB (PRMPROD).
- Gross-to-Net Table (02) – Use the transactions in CARDLIB (GTNPROD).

Gross-to-Net updates are provided to add the new GTN numbers related to the Postdoc Benefits. ***Do not use the member GTNTEST for production usage.***

Use the transactions in PAYDIST.R1607.CARDLIB(GTNPROD), or key from the provided facsimile UPAY545 form. ***Note that the local GTN Priority Numbers must be assigned in place of the '????' in columns 4 through 7.***

These transactions may be used for production, with the approval of your campus Payroll Manager. ***Do not use member GTNTEST for production purposes.***

- Data Element Table (06) – Use the transactions in CARDLIB (DETPROD).
- Message Table (08) – Use the transactions in CARDLIB (MSGPROD).
- Processing Group Table (36) – Use the transactions in CARDLIB (PGTPROD).
- Routine Definition Table (37) – Use the transactions in CARDLIB (RTDPROD).

11. Run PPO1607A immediately following Monthly Maintenance to begin December, and immediately process the X1 transactions generated by PPO1607A into the EDB File Maintenance process to update the EDB.

12. After all postdoc benefit enrollments are complete and the one-time PPO1607A has already run, PPO1607B must be run to generate the benefits carrier file. The resulting file should be named **FTPUSRn.PUT.PDOE.Y2004**, where n is your campus ID, and uploaded to the regular FTP directory.
13. Obsolete Object.
Follow local procedures for removing the obsolete COBOL member PPEG225.
