8. Test Compute process for the Coverage Level Derivation
9. Test Monthly Maintenance Modifications for New Mexico Dependents
CONTROL TABLE (CTL) INITIAL LOAD (LOADCTL)

Description

This job loads the DB2 CTL database.

If there are any Control Table Transaction updates for this release, the Control Table Transaction updates are already reflected in the particular PDS members used for the loading of the DB2 CTL database.

Verification

Ensure that the DB2 CTL has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the database.

EMPLOYEE DATA BASE (EDB) INITIAL LOAD (LOADEDDB)

Description

This job loads the EDB database.

Verification

In order to assure successful completion of this job, verify that the EDB has been successfully restored by verifying normal completion of the job and ensuring that all tables have been successfully loaded into the database.
APPLY CONTROL TABLE (CTL) CHANGES (RUN004)

**Description**

This job applies the new records to the CTL database.

**Verification**

In order to assure successful completion of this job, verify that all the CTL records have been successfully inserted or updated into the database tables.

Verify that:

1. Changes made to the value of Range/Value field for the data elements EDB0635 and EDB0638 into the table PPPDET. Verify that there will be 2 record changes for each data element, one for the card type ‘DM’ and another without card type.

<table>
<thead>
<tr>
<th>Element</th>
<th>Field in PPPDET</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDB0638</td>
<td>DET_VAL_RNG_EDTS</td>
<td>SCOPWGDLKAN</td>
</tr>
<tr>
<td>EDB0638</td>
<td>DET_VAL_RNG_EDTS</td>
<td>NYIM</td>
</tr>
</tbody>
</table>

2. Three new records are added into the table PPPCTT (2 for data element EDB0635 and 1 for data element EDB0638).

3. Eighteen new records are added to the messages table PPPMSG with the message numbers 08453, 12453, 08450, 12450, 08451, 12451, 08521, 12521, 08528, 12528, 08538, 12538, 08539, 12539, 08529, 12529, 08493, and 12493.
   
   Also verify the two changes made for the messages 08535 and 12535 in the PPPMSG table.
LOAD Data Dictionary for Field level help (LOADDDSE)

**Description**

The steps used for loading field level data dictionary are:

1. Go to CICS and enter the command CEMT INQ FI(D21HLP2).
2. Change the status of this file from ‘OPE’ to ‘CLO’ and then press Enter.
3. Submit the JCL LOADDDSE which loads these new help definitions to the CICS Help file. These definitions will be used in the CICS screens for help links.
4. Now Go to CICS again and enter the command CEMT INQ FI(D21HLP2).
5. Change the status of this file from ‘CLO’ to ‘OPE’ and then press Enter.

**Verification**

In order to assure successful completion of this job, verify that the LOADDDSE has been successfully restored by verifying normal completion of the job and ensuring that the data elements EDB0635 and EDB0638 in the EDEP screen show these changed help messages.

Test CICS Screen IMEM and Program PPWIMEM

**Description**

Test the addition of a description 'Child-Disabled' for Non Tax-dependent Overage Disabled Child (Rel Code 'N') when Deenrollment Indicator is 'Y' in the IMEM CICS Membership Data screen.

After successful installation of the CICS program, make a newcopy in the region you are going to test the IMEM screen. After successful newcopy go to PPS and browse an employee with IMEM screen.

Select the employee ID 000050020 with option IMEM in the PPS CICS system. Verify in this screen that for the dependent number 02, the description of relation is ‘Child-Disabled’.
Test Modifications of Dependent Edit

Description

After loading the EDB and CTL tables, we will run file maintenance to add few dependents and then check the rejects to verify that the new edits are working correctly. All the transactions needed to add the dependents are in the card member PAYBCC.RLSE.CARDEXP(DEPTEST). Also note that the current date of the EDB which is used to calculate the cutoff date is SCR_CURRENT_DATE is 07/01/2004.

Run the RUNFM file maintenance job with the above card as input. Verify the output of the job and check all the rejects of these transactions which is caused by the newly added edits.

Test Monthly Maintenance Modifications for New Mexico Dependents

Description

Now we run the monthly maintenance process to test the changes made for the New Mexico dependents. The current date of the EDB (SCR_CURRENT_DATE) is 07/01/2004. The job to run monthly maintenance is RUN130M and the month we are going to start is 08/01/2004.

The JCL RUNQUERY has a SQL to select all the New Mexico employees’ dependents details (employee id, dependent number, birth date, medical/dental/vision/legal coverage end dates, relationship to employee and disabled code) whose birth dates are between 01/01/1979 and 12/31/1981. Submit the JCL which gives all the details of the New Mexico dependents mentioned above. The following table gives all the details by this SQL query.
