This release addresses the following error report:

**Error Report 1947**

It has been reported from UC Santa Barbara that the Federal W2 Tape file contained two errors.

It has been found that the Employer-Contributions-to-a-Health-Savings-Account field was not added to the RW type record structure in positions 364 through 374. Also, the Total-Employer-Contributions-to-a-Health-Savings-Account field was not added to the RT type record structure in positions 250 through 264. Due to the two fields not defined on the RW and RT record structures, positions 364 through 374 incorrectly contain blanks on the RW type records, and positions 250 through 264 incorrectly contain blanks on the RT type record.

The Employer-Contributions-to-a-Health-Savings-Account field on the RW type records should be initialized to zeroes, and the Total-Employer-Contributions-to-a-Health-Savings-Account field on the RT type record should be initialized to zeroes.

Copymember CPWSTXTP should be modified to include the Employer-Contributions-to-a-Health-Savings-Account field (364 – 374) on the RW type record structure with an initial value of zeroes, and the Total-Employer-Contributions-to-a-Health-Savings-Account field (250 - 264) should be included on the RT type record structure with an initial value of zeroes.

**Copymember**

CPWSTXTP
Copymember CPWSTXTP has been modified to include the Employer-Contributions-to-a-Health-Savings-Account field (364 – 374) on the RW type record structure with an initial value of zeroes, and the Total-Employer-Contributions-to-a-Health-Savings-Account field (250 - 264) is included on the RT type record structure with an initial value of zeroes.

Test Plan

No Test Plan document is provided with this release.

Installation Instructions

1. Modify and install the copymember listed in the following table.

<tr>
<th>Copylib Members</th>
<th>Installed?</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPWSTXTP</td>
<td></td>
</tr>
</tbody>
</table>

2. Program Preparation

   Note: At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

   Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively), and DUAL-ONLINE programs must be compiled once only and linked into the online library. "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

   a) Compile and link the unmodified programs listed in the following table.

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2 Pre-Compile</th>
<th>Compile</th>

4. Testing

   No test materials are provided in this release. The EDB data from Release 1614 can be used to verify the correct installation of this release. After PPP600 has completed, verify that zero values are present in positions 364 through 374 of the RW type records, and zero values are present in positions 250 through 264 of the RT type record.

   Perform any desired additional campus testing.

5. Place modified objects in production.
Timing of Installation

The installation of this release is Urgent.

For those campuses who have already installed Release 1614, this release must be installed immediately and the Federal W-2 Tape File produced with the correct data.

For those campuses who have not yet installed Release 1614, this release must be installed together with Release 1614.

As usual, campuses are encouraged to install this release in as timely a fashion as possible, and in the normal numeric sequence of releases.
