Re: Release: 1645
Reference Release: 1415, 1596
Error Reports: 1967, 1972
Web HTML: None
Web Macros: UCWINBX, UCWPANROUTER
Web Include Members: None
Web Images: None
Table Updates: None
Urgency: Not Urgent (See Timing of Installation)

Error Report 1967

Error Report 1967 reported that from the Web PAN inbox, if the user clicks on "click here to specify selection criteria", the selection criteria entry screen has a large empty header section, requiring that the user scroll down to enter the selection criteria and press the submit button.

With this release, this cosmetic error has been corrected.

Error Report 1972

Error Report 1972 reported that when the user first enters the Web PAN inbox, or when the submit button is pressed from the notification selection screen, there is a long wait while the total number of PANs is counted.

With this release, a change was made to improve performance.

Web Macros:

UCWINBX.D2W

UCWINBX is the PAN inbox and selection results screen macro. Performance was improved by removing the outer joins from the COUNT SQL statement.
UCWPANROUTER.D2W

UCWPANROUTER is the PAN navigation router. Currently, this macro contains code which sets the top margins for each individual Web page. When new Web page UCWINR2 was released in Release 1596, code was inadvertently omitted from this macro to control top margin height.

With this release, the top margin for Web page UCWINR2 no longer defaults to a large blank space.

Installation Instructions

Review and edit the job “PDS2HFS” in the JCL library to transfer the web application files to the application directory structure. Edit the control statements to supply the local macro directory name created in the Web EDB inquiry release 1408.

Run this jobstream once the necessary customization has been made.

After running the PDS2HFS jobstream, verify that the following Net.data files were copied to the “macro” directory created in the Web EDB inquiry release 1408:

<table>
<thead>
<tr>
<th>Filename</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ucwinbx.d2w</td>
<td>Inbox and selection results screen</td>
</tr>
<tr>
<td>ucwpnanrouter.d2w</td>
<td>PAN navigation router</td>
</tr>
</tbody>
</table>

Once the macro files have been copied, use the `chmod` command to set permissions on all files to 755. The group ownership of all files may be left as-is, assigned to the group associated with the installer ID.

```
$ chmod 755 *
```

Test Plan

No further installation testing is required other than verifying that the above Net.data files were copied to the “macro” directory created in the Web EDB inquiry release 1408.

Campuses are encouraged to perform any other desired local testing.

Timing of Installation

The installation of this release is not urgent.

As usual, campuses are encouraged to install this release in as timely a fashion as possible, and in the normal numeric sequence of releases.

If there are any questions, please send electronic mail to Susan.Isaacs@ucop.edu, or call at (510) 987-0465.
