Introduction

This document provides installation instructions for Release 1650.

Installation Sequence

1. COBOL Program Installation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Note: "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

Install, compile and link the **modified** programs listed in the following table.

PROGRAM	DB2 Pre-Compile	Compile	Package Bind?	Done?
PPP080	Yes	Batch	No	

2. Bind the following Plans.

Bind Plans	Done?
PPP080	

- Execute and verify the rest of the test plan, per supplied instructions.
- Place modified objects in production.
- Install Control Table (CTL) updates into production.

Execute **PPP004** to update the following DB2 CTL table with **release transactions**.

- System Messages Table (08) – Use the UPAY554 transactions in CARDLIB (MSGPROD).
