This release addresses the following Error Report:

**Error Report 2110**

Error report 2110 states that the Sabbatical Credit Accrual information displayed in the appointment information section of an employee IDOC may be inaccurate if an employee has more than one appointment.

**Programs**

**PPDXAPPT**

PPDXAPPT builds the appointment information segment for employee documents.

It has been modified so that each appointment’s Academic Sabbatical Eligibility Code Indicator is evaluated and printed correctly on the IDOC when an appointment is eligible for Sabbatical Credit Accrual.
Installation Instructions

COBOL Program Preparation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

Install, compile, and link the following modified programs:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>

<th>Package Bind?</th>
<th>Done?</th>
