Release 1789

Service Request 81975
2007 Merit Enhancements to Reports PPP6751
and PPP6761– Phase I

Installation Instructions

October 5, 2007
Prepared by Janet Kennedy

Information Resources & Communications
Office of the President
University of California
This document provides installation instructions for release 1789. Please review these instructions carefully before proceeding with the installation.

1. **COBOL Program Preparation**

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

The “SPAS” designation indicates that a module needs to be compiled and linked into the appropriate SPAS loadlib. If only “SPAS” is indicated in the Compile column, then the module is either a called procedure, or only called by a stored procedure. The SPAS package bind differs from that used for CICS dual-use binds. If the SPAS application is running, a STOP and START PROCEDURE is required to install the new version.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

1.1 Install, compile, and link the following modified program:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPP676</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

2. **Plan Binds**

2.1 Bind the following plan:

<table>
<thead>
<tr>
<th>Bind Member</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPP676</td>
<td></td>
</tr>
</tbody>
</table>

3. **JCL Changes**

3.1 Make modifications to the JCL for program PPP676 adding DDname RPTFIL for the new Error Report. A sample of this JCL can be found in JCL member (RUN676).

4. **Testing**

4.1 Perform installation verification testing as described in the Test Plan. In addition, perform any further local testing.
5. **Install in Production**

5.1 Place modified objects in production.

6. **Control Table Updates**

6.1 Execute **PPP004** to update the following DB2 CTL table with release transactions.

- **System Messages Table (08)** – Use the transactions in CARDLIB (MSGPROD).
