This release addresses the following Error Report(s):

**Error Report 2133**

The PAR expansion project (R1571, R1588) increased the number of earnings distributions on the PAR from 99 to 500. COHR (Cancellation, Overpayment, Hand-drawn, Rush Check) transactions and expense transfer transactions must be processed as a set by the pay edit; the set size limit is currently 100. If it is exceeded, message 36-085 (TRANSACTION SET CAPACITY EXCEEDED) is issued. The transaction set table needs to be expanded to handle up to 500 earnings distributions as well as the rest of the transactions in the set.

In order to allow ample room for a transaction set with 500 earnings distributions and at least one each of the other record types (the type 1, 3, 4, and 5 records for COHRs), the table size will be set to 600.

**Programs**

PPP360

PPP360 and related modules act as the batch and online infrastructure for the editing of payroll compute transactions prior to placement on the THF. It was modified to set TRAN-SET-ARRAY-MAX to match the new OCCURS (600) of TRAN-ARRAY-THF-IMAGE in CPLNKTS.

**Copy Members**

CPLNKTS

CPLNKTS defines a linkage area for a transaction set array in the pay edit. It was modified to increase the size of TRAN-ARRAY-THF-IMAGE from 100 to 600.

**Timing of Installation**

The timing of this release is **urgent**. It should be installed as soon as possible to prevent the rejection of COHR transaction sets with more than 100 records.

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.
