This release addresses Error Report 2161

**Error Report 2161**

Several lines of unchanged code in program PPWEPD1 were deleted by mistake in release 1800. The deleted code displays the Number of Units (EDB0237). The error is that when any other field on the screen is updated, the non-blank value in the Number of Units field disappears when the Enter key is pressed. After the employee record is updated, the Number of Units value is displayed again.

**Program**

PPWEPD1

PPWEPD1 is the screen processor for the EPD1 function (Employee Personal Data 1). The program has been modified to reinstate the deleted code.

**Installation Instructions**

1. **Program Preparation**

   At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

   "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.
Install, compile, and link the following modified program:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPWEPD1</td>
<td>NO</td>
<td>CICS</td>
<td>NO</td>
<td></td>
</tr>
</tbody>
</table>

Test Plan
A separate test plan document is provided for this release.

Timing of Installation
The timing of this release is not urgent. As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.

If there are any questions, please send electronic mail to Robert.Glaser@ucop.edu or call (510)987-0454
