Testing Overview

This document addresses the test runs and cases constructed to verify the correct installation of Release 1818. The test is made up of the following steps:

1. Control Data Base (CTL) Initial Load (LOADCTL)
2. Employee Data Base (EDB) Initial Load (LOADEDB)
3. Execute job RUN240A
CONTROL TABLE (CTL) INITIAL LOAD (LOADCTL)

Description
This job loads the DB2 CTL database.

Verification
Ensure that the DB2 CTL has been successfully restored by verifying normal completion of the job and verifying that all tables have been successfully loaded into the data base.

EMPLOYEE DATABASE (EDB) INITIAL LOAD (LOADEDDB)

Description
This job loads the DB2 EDB database.

Verification
Ensure that the DB2 EDB has been successfully restored by verifying normal completion of the job and verifying that all tables have been successfully loaded into the data base.
EXECUTE JOB RUN240A

Description

The purpose of this test is to produce the PPP2401 Run Control report when the program terminates successfully.

Verification

Verify that the report headings for the PPP2401 Run Control report generated during your testing reflect the following changes:

   The second report heading line contains the updated report title of “SPECIAL TRAINING CODE”.
   The third heading line contains the following changes:
   • The EFFECTIVE DATE field no longer appears on the report
   • The updated report title “RUN CONTROL REPORT” should now appear on the report.

Member PPP2401 on the REPORTS PDS can also be used for verification of successful installation.
