Release 1819

Service Request 82183
COBRA IDOC Text Changes

Installation Instructions

May 16, 2008
Prepared by Robert Glaser

Information Resources & Communications
Office of the President
University of California
This document provides installation instructions for release 1819. Please review these instructions carefully before proceeding with the installation.

1. **COBOL Program Preparation**

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

1.1 Install, compile, and link the following modified programs:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPDXCOBR</td>
<td>YES</td>
<td>CICS</td>
<td>YES</td>
<td></td>
</tr>
</tbody>
</table>

2. **Testing**

2.1 Perform installation verification testing as described in the Test Plan. In addition, perform any further local testing.

3. **Install in Production**

3.1 Place modified object in production.
