1. **CICS Map Generation**

   1.1 Install the source code contained in DGIPNL for the maps listed below.

   1.2 Use SDF II option 6 to generate the BMS macro and the COBOL data structure.

   1.3 Assemble the BMS macros to produce the physical map description used by CICS/BMS.

2. **COBOL Program Preparation**

   At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

   "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

   2.1 Install, compile, and link the following modified programs:
