University of California
This document provides installation instructions for release 1927. Please review these instructions carefully before proceeding with the installation.

1. **COBOL Program Preparation**

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

1.1 Install, compile, and link the following new one-time program:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT1927</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

2. **Plan Binds**

2.1 Bind the following plan:

<table>
<thead>
<tr>
<th>Bind Member</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT1927</td>
<td></td>
</tr>
</tbody>
</table>

3. **JCL Changes**

3.1 Create JCL for the one-time program listed below. The test JCL can be used as a model to create the production JCL.

<table>
<thead>
<tr>
<th>Program</th>
<th>Sample JCL</th>
<th>Installed?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT1927</td>
<td>RUNO1927</td>
<td></td>
</tr>
</tbody>
</table>

4. **Testing**

4.1 Perform installation verification testing as described in the Test Plan. In addition, perform any further local testing.

5. **Install in Production**

5.1 Place modified objects in production.
