This release addresses the following Error Report:

**Error Report 2392**

Error report 2392 states that when the PS002 web service (time reporting) issues the message "P0-169 New EDB distribution, re-enter time if appropriate" the time table update is not processed. This message has severity 0 and should not prevent an update from occurring.

**Programs**

PPWEDHC is the screen processor for the EDHC function (Time Input Roster). It has been modified to not return an error message when PPWEDHC is called from the web service and the message is either P0164 (EDB distribution data has changed), P0166 (DB appointment now exception), P0167 (EDB appointment now positive), P0168 (EDB distribution deleted or ineligible) or P0169 (New EDB distribution).
Installation Instructions

COBOL Program Preparation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

Install, compile, and link the following new one-time program:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPWEDHC</td>
<td>Yes</td>
<td>CICS</td>
<td>Yes</td>
<td></td>
</tr>
</tbody>
</table>

Test Plan

A separate Test Plan document is provided for this release.

Timing of Installation

The timing of this release is not urgent.

As usual, campuses are encouraged to install this release in as timely a fashion as possible and in the normal numeric sequence.
