Testing Overview

This test plan addresses the test runs and cases constructed to verify the correct installation of Release 2027.

The test is made up of the following components:

- Web testing

Web Testing

1. Test PPWeb application

   1.1. **Action:** Logon to PPS with a valid user ID and password.
       **Result:** The main menu is displayed. Verify that the version information at the bottom of the screen says “Version 2.8 (R2027)”.

2. Test EDB Inquiry application

   2.1. **Action:** Logon to PPS with a valid user ID and password which has access to the Web EDB Inquiry and select the “Employee Database (EDB) Inquiry”.
       **Result:** The Employee Selection screen is displayed. Verify that the version information at the bottom of the screen says “Version 2.8 (R2027)”.

3. Test EDB Update application

   3.1. **Action:** Logon to PPS with a valid user ID and password which has access to the Web EDB Update and select the “Change Existing Employee Records”.
       **Result:** The Employee Selection screen is displayed. Verify that the version information at the bottom of the screen says “Release 3.1 B001 (R2027)”. Also verify that there is a campus logo at the top of the page and the screen is formatted correctly without any errors.

4. Test Web Merit application

   4.1. **Action:** Logon to PPS with a valid user ID and password which has access to the Web Merit and select the “Web Merit”.
       **Result:** The Merit Menu is displayed.
