This release addresses the following Service Request:

**Service Request 83879**

Service Request 83879 provides the following background information:

Research was conducted to identify the downstream impact in TCS/TCT/PPS systems when PSS title range is used for MSP titles. It was determined that only two PPS programs need to be changed – PPEC002 and PPEI002. This service request was submitted to make the necessary changes to these two programs.

Program changes are needed to eliminate the dependency on a specific title code range for MSP titles. These changes will allow the use of MSP title codes in the range previously reserved for PSS titles.

With the removal of the salary grade/title code range validation, nine error messages became obsolete and were deleted from the Message Table.

**Programs**

**PPEC002**

PPEC002 performs consistency edits on the title and related fields of an appointment. It has been modified to remove the consistency edits which validated the grade using hard-coded title ranges.

**PPEI002**

PPEI002 performs consistency edits and maintenance on the title and related fields of an appointment. It has been modified to remove the consistency edits which determined which grade/title combinations are valid.
Table Updates

System Messages Table

PPPMSG table contains the message text, severity, and reporting requirements for error and warning messages. Deletions of the following messages are provided in cardlib MSGPROD:

- 08720
- 08745
- 08746
- 08747
- 08749
- 12920
- 12745
- 12746
- 12747

Installation Instructions

COBOL Program Preparation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

Install, compile and link the following modified programs:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPEC002</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
<tr>
<td>PPEI002</td>
<td>Yes</td>
<td>Dual</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

Control Table Updates

Execute PPP004 to update the following DB2 CTL tables with release transactions.

System Messages Table (08) – Use the transactions in CARDLIB (MSGPROD)

Test Plan

An installation Test Plan is provided as a separate document.

Timing of Installation

The timing of this release is Urgent. Changes must be implemented as soon as possible.

As always, this update should be applied to production data only as approved by your campus Payroll Manager.

Functional questions should be addressed to Nancy Kwong at (510) 987-9047 or Nancy.Kwong@ucop.edu.

For technical questions, please send electronic mail to Kathy.Stevens@ucop.edu, or call (510) 987-0441.
