This document provides installation instructions for release 2111. Please review these instructions carefully before proceeding with the installation.

Please refer to Functional letter for this release which will include instructions for a manual process to issue refunds to employees who have unrepresented fees deducted from the lump sum amount.

1. COBOL Program Preparation

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

"DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

1.1 Compile and link the following new one-time program:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Package Bind?</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT2111</td>
<td>Yes</td>
<td>Batch</td>
<td>No</td>
<td></td>
</tr>
</tbody>
</table>

2. JCL Changes

2.1 Create JCL for the one-time program. The test JCL can be used as a model to create the production JCL.

<table>
<thead>
<tr>
<th>Program</th>
<th>Sample JCL</th>
<th>Installed?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT2111</td>
<td>RUN2111</td>
<td></td>
</tr>
</tbody>
</table>

3. Testing

3.1 Perform installation verification testing as described in the Unit Test section of the TSD. In addition, perform any further local testing. Install in Production.

3.2 Place modified objects in production.

3.3 Run PPOT2111 and produce the tab-delimited files using the Merged PAR file.

3.4 Use the FT transaction files from program PPOT2111 as input to the compute.

3.5 The tab delimited and costing files from PPOT2111 are for local reporting use.
