This document provides installation instructions for release 2123. Please review these instructions carefully before proceeding with the installation.

1. **COBOL Program Preparation**

   At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

   The “SPAS” designation indicates that a module needs to be compiled and linked into the appropriate SPAS loadlib. If only “SPAS” is indicated in the Compile column, then the module is either a called procedure, or only called by a stored procedure. The SPAS package bind differs from that used for CICS dual-use binds. If the SPAS application is running, a STOP and START PROCEDURE is required to install the new version.

   "DUAL" programs must be compiled twice and linked into batch and online libraries ("LOADLIB" and "OLOADLIB" respectively). "CICS" programs must be CICS pre-compiled and compiled once and linked into OLOADLIB. "BATCH" programs must be compiled once and linked into the batch LOADLIB only.

1.1 Install, compile, and link the following **modified** programs:

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>DB2?</th>
<th>Compile Type</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT2123</td>
<td>Y</td>
<td>Batch</td>
<td></td>
</tr>
</tbody>
</table>

2. **JCL Changes**

2.1 Test JCL is provided with this release. The test JCL can be used as a model to create the production JCL.

<table>
<thead>
<tr>
<th>PROGRAM</th>
<th>Sample JCL</th>
<th>Done?</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPOT2123</td>
<td>RUN2123</td>
<td></td>
</tr>
</tbody>
</table>

   The batch header record for the FT transaction files was set to ‘599’ (stored in work field ‘BATCH-HD-NUMBER’) in PPOT2123.

3. **Testing**

3.1 Perform installation verification testing as described in the release letter. In addition, perform any further local testing.

4. **Install in Production**

4.1 Place the one-time program in production.
4.2 Create a merged PAR file including March 2014 Final PAR.
4.3 Run RUN2123 JCL using the Final PAR as input to DD PAYAUDIT.
4.4 Use the FT transaction files created by program PPOT2123 as input to the appropriate computes.
4.5 The tab delimited and costing files from PPOT2123 are for local reporting use.
