This release addresses the following Service Now Ticket:

RITM0036811

Additional issues with the Annual Base Benefit Rate (ABBR) modifications were identified after the releases for this project (2087, 2096, 2100 and 2103):
1. The salary base calculations do not account for the different annual work hours for hourly-paid firefighters.
2. The salary base calculations do not account for by-agreement ‘cap gap’ DOS codes.

This release addresses corrections for these issues.

Programs

PPEI720

PPEI720 performs implied maintenance on insurance salary bases and the Medical Contribution Salary Bases (MCBs). It has been modified to use a different standard-work-hours value for annualizing pay rates for hourly-paid firefighters.

Additionally, the program has been modified to account for additional flat-amount DOS codes that account for the difference between salary caps that apply to pay rates and the employee’s expected salary.

PPP570

PPP570 calculates the salary bases of various insurance benefits and generates EDB update transactions (IE, DE, X1) to update the appropriate salary bases. It has been modified to use a different standard-work-hours value for annualizing pay rates for hourly-paid firefighters.
Additionally, the program has been modified to account for additional flat-amount DOS codes that account for the difference between salary caps that apply to pay rates and the employee’s expected salary.

**Installation Instructions**

**COBOL Program Preparation**

At UCOP, all COBOL programs pass through the DB2 pre-compiler, whether or not the program contains embedded SQL, to resolve INCLUDE references. Your site may have different requirements.

Install, compile and link the following modified programs:
