PPP743 PROGRAM RUN SPECIFICATION

UPAY799 (10/92)

PROGRAM ID	SYSTEM ENTRY DATE OVERRIDE	SYSTEM ENTRY TIME OVERRIDE	M	Q	Y	F	P	I			
1	11	12	17	18	23	24	25	26	27	28	29
PPP743-SPEC	Y Y M M D D	H H M M S S									

SYSTEM ENTRY DATE OVERRIDE

- Leave blank for normal PPP743 processing. (When the SYSTEM ENTRY DATE OVERRIDE is blank, PPP743 will default the System Entry Date to the date PPP743 is run.)
- Enter a date value to be placed on HDB entries for special PPP743 processing. See **CAUTION**, below.

SYSTEM ENTRY TIME OVERRIDE

- Leave blank for normal PPP743 processing. (When the SYSTEM ENTRY TIME OVERRIDE is blank, PPP743 will default the System Entry Time to the time PPP743 is run.)
- Enter a time value to be placed on HDB entries for special PPP743 processing. See **CAUTION**, below.

PROCESSING INDICATORS

- M** Enter **M** to perform HDB Monthly Maintenance.
- Q** Enter **Q** to perform HDB Quarterly Maintenance.
- Y** Enter **Y** to perform HDB Calendar Year-End Maintenance.
- F** Enter **F** to perform HDB Fiscal Year-End Maintenance.
- P** Enter **P** to perform HDB Purge Processing.
- I** Enter **I** to perform Initial HDB Load (Note: Once the HDB has undergone Initial Load Processing and Normal HDB Capture Processing has occurred, this specification must not be entered on the PPP743 Program Run Specification.)

CAUTION

Use of the SYSTEM ENTRY DATE OVERRIDE and/or the SYSTEM ENTRY TIME OVERRIDE is intended for processing outside the normal sequence of HDB data capture. The primary purpose of these overrides is to force a specific System Entry Date/Time stamp onto HDB entries made by PPP743.

Use of either of these two overrides should be undertaken with extreme caution as HDB indexes and/or data can easily be corrupted by running PPP743 with an override which causes insertion of HDB entries for a date/time which falls between two date/times already recorded on the HDB. It is recommended that a thorough review of HDB data be conducted both before and after running PPP743 with either System Entry Date or System Entry Time overrides.
